- Mockup
- VScode
- GitHub
- BrowserStack

EDUCATION

2024

CAREER FOUNDRY

UI Design | UX | Front-End Development

2009

THE UNIVERSITY OF SYDNEY

Bachelor of Pharmacy

PROFILE

“My nearly two decades of experience working in a highly regulated industry, across different healthcare organisations and the non-for-profit sector, has allowed me to develop an ability to interpret and apply regulations in a way that is accessible to others. It has enabled me to undertake complex programs of work and deliver user-centric results. This, along with my UX/UI qualifications and hands on experience through job simulations with major companies like BCG, BP and Accenture North America, informs my capacity to move forward into product design, where I will take these skills and leverage them to create more intuitive digital experiences for clients and end users”.

RELEVANT CAREER EXPERIENCE

DIGITAL PRODUCT DESIGNER

Freelance | Sydney

April 2019 - Present

- Launched an e-commerce wellness store in April 2019, creating a calming, intuitive interface that aligned with brand guidelines, resulting in a 25% boost in online sales in the first three months and the development of a loyal customer base.
- Designed a vibrant, engaging website for an e-commerce cocktail kit store in March 2021, boosting user engagement by 20% and increasing sales by 15% by capturing the playful spirit of the product.
- Contributed to the enhancement of a banking app for millennials during a job simulation with BCG in July 2024, providing strategic UX design solutions tailored to the target demographic for an Indonesian bank. We were able to implement key features to enhance user engagement on the platform.
- Collaborated with BP in a job simulation in August 2024 to streamline an EV charging app, focusing on digital design and UX research to improve user experience and navigation. The aim was to provide users with data of the relevant available chargers along their path, as well as the details of charging options that were within range.
- Participated in a job simulation in August 2024 with Accenture North America, designing an intuitive and feature-rich music player app with a lyrics display feature to enhance user interaction and engagement.

JARUSHA NOLAN

UX/UI DESIGNER | PHARMACIST

RELEVANT CAREER EXPERIENCE

CLINICAL PHARMACIST

St John of God Healthcare | Sydney

Oct 2020 - Present

- Significantly improve user outcomes by undertaking medication reconciliation. This involves ensuring a clear and accurate medical history is captured in accessible language.
- Collaborate with the healthcare team to ensure all points of view are taken into consideration when developing holistic management plans for users.
- Effectively communicate complex medical information to users enhancing comprehension and therefore improving health outcomes.
- Facilitate communication in challenging situations by de-escalating heightened users and providing sensitive counselling, thereby harnessing a psychologically safe environment for all stakeholders.
- Maintain organisational budget by adhering to core formulary, thus ensuring costs remain within the required limits.

CLINICAL PHARMACIST

NSW Health (formerly HDHS) | Sydney

Sept 2019 - April 2023

- Utilised my broad understanding of the Pharmaceutical Benefits Scheme to ensure pharmaceutical services across the organization met NSW accreditation standards so stakeholders received optimal care.
- Efficiently managed multiple priorities in order to effectively meet competing deadlines and ensure projects were continuously delivered on time.
- Optimised user safety by the prompt reporting of adverse drug reactions to the Therapeutic Goods Administration, in order to highlight the profile of unsafe drug use.
- Enhanced the knowledge base of the healthcare team by providing concise in-service training thus improving stakeholder outcomes.
- Methodically managed high volume inventory hospital-wide to ensure prime supply was maintained for the end user.
- Successfully implemented a hospital-wide audit to accurately analyse antimicrobial practices across the facility and thereby enhance user safety.

PHARMACIST

Lynch's Pharmacy | Sydney

Nov 2005 - Sept 2020

- Undertook service claiming to enhance pharmacy remuneration leading to optimised user outcomes.
- Implemented stringent policies pharmacy-wide to meet accreditation processes and ensure user safety.
- Mentored intern pharmacists to successfully meet registration requirements in a safe environment.
- Maintained medication management technology systems to ensure optimal outcomes for stakeholders.
- Spearheaded promotional health events to enhance user knowledge and improve health outcomes.

JARUSHA NOLAN

UX/UI DESIGNER | PHARMACIST

ACADEMIC EXPERIENCE

CAREER FOUNDRY UX/UI DESIGN CASE STUDIES

Fresh Produce E-Commerce Store - Farm to Table

Timeframe - 2 weeks - Nov to Dec 2023

- Created a responsive mobile web app by incorporating all UX/UI best practice principles.
- Utilised Figma, Miro and Lyssna during the research and design processes in order to develop an intuitive product.
- Constructed user stories and flows that informed the app design.
- Developed low, mid and high fidelity wireframes in order to craft an innovative digital solution.
- Designed brand guidelines to ensure a cohesive product was created for the end user.
- Integrated usability and preference testing to iterate a more effective design.

Native Mindfulness App - Restore

Timeframe - 3 weeks - Oct 2023

- Created an intuitive native app for both iOS and Android screens.
- Utilised Figma and Miro to effectively inform the design.
- Performed a competitive analysis and developed user flows in order to produce a user-centric design.
- Developed low, mid and high fidelity wireframes to enhance the user experience.
- Incorporated usability testing to iterate a user-friendly design.

Responsive Recipe Web App - Nourish Ninja

Timeframe - 11 weeks - July to Oct 2023

- Crafted a responsive web app by aligning with UX/UI best practice principles.
- Utilised Figma, Miro and Prott to create an intuitive design.
- Performed a SWOT analysis to inform the app's design.
- Developed user personas, a MVP and user flows to enhance the design of the digital product.
- Employed rapid paper prototyping to optimise the app design.
- Created low, mid and high fidelity wireframes to ensure an intuitive experience for the end user.
- Utilised usability testing to iterate an innovative design.

VOLUNTEER/LEADERSHIP EXPERIENCE

- Effectively mentored intern pharmacists, by overseeing weekly tasks, to meet NSW guidelines.
- Solely formulated and delivered in-service training across hospital, aged care and community settings to enhance stakeholder outcomes.
- Procured and wrapped Christmas gifts for underprivileged primary school children in order to bolster good spirits during the holiday season and spread some much needed joy.
